UET , Main Campus Lahore

ABOUT ME:

I am a hardworking and motivated undergraduate student who has completed the second semester of my BS in Computer Science at UET Lahore. I am eager to gain hands-on experience, enhance my skills and contribute positively to a professional environment. I am committed to learning, adaptable to new challenges, and dedicated to giving my best in every task.

WORK EXPERIENCE:

1.Eatsy Website(HTML/CSS):

Visually appealing platform for exploring a variety of coffee and pastry menu options, adding items to cart, and placing online orders.

2.Karate Pro (C++ Console App):

User-friendly console-based application developed in C++ for efficiently managing karate academy students and instructors.

3.Among Us (C++ Console Game):

A challenging maze survival game developed in C++, featuring intelligent enemy movement, dynamic obstacles, health tracking, and score-based progression to test strategic thinking and quick reflexes.

4.ITEC Management System:

A desktop application built in C# for managing tech competition registrations and event data. Integrated with a MySQL database for efficient record handling.

5.ModestAura – Islamic Clothing Store:

A C# application with an attractive user interface for buying and selling items like hijab, niqab, abaya and more. Connected with MySQL for dynamic product and order management.

6.Kaar-e-Kamal Welfare Organization Management:

Developed a C# and MySQL-based system to manage donations and donor records for a welfare organization, ensuring secure and organized data handling.

ONGOING PROJECTS:

Developing a dynamic and responsive website using HTML, CSS, and JavaScript, incorporating secure user authentication, organized product listings, and smooth navigation to enhance user experience and functionality

SKILLS

- **C#**
- **MySQL**
- **C++**
- **HTML**
- **Java Script**
- **CSS**
- **Python**
- **Microsoft Office**
