Education

Bachelor of Science in Computer Science

University of Engineering and Technology (UET), Lahore

Summary

Full Stack Developer with hands-on experience building web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Skilled in RESTful API design, database management, and integrating AI/ML components including RAG pipelines and LLM APIs. Available for remote roles.

Technical Skills

Languages: JavaScript (ES6+), Python, C++, C#, C

Frontend: React.js, React Native, HTML5, CSS3, Bootstrap CSS, Tailwind CSS, Redux, TypeScript, Angular

Backend: Node.js, Express.js, Flask, RESTful APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, MySQL, CockroachDB, pgvector, Neo4j

AI/ML: Gemini API, RAG pipelines, Semantic Search, Linear Regression, Sentence Embeddings (all-MiniLM-L6-v2)

Tools: Git, GitHub, VS Code, Postman, Wokwi, Docker

Work Experience

Teaching Assistant | University of Engineering and Technology, Lahore

December 2025 – April 2026

- Conducted lab sessions for over 100 students in PF and OOP courses
- Debugged student code across C++ assignments, identifying logic and compilation errors efficiently

Frontend Development Intern | Internship Pakistan

August 2025 – September 2025

- Built responsive interfaces using HTML, CSS and JavaScript
- Optimized page load times by 30% through code refactoring and component reuse
- Collaborated with team through clear communication to deliver UI components on schedule

Projects

StudyBuddy: AI-Powered Study Management System (Node.js, Express.js, CockroachDB, Gemini AI)

- Built linear regression predictor and RAG AI chatbot using pgvector semantic search and sentence embeddings
- Designed CockroachDB schema with Views, CTEs, and ACID-compliant transactions

MERN Stack School Management System (React, Node.js, Express.js, MongoDB, JWT)

- Built role-based dashboards for Admin, Teacher, and Student with JWT authentication
- Implemented attendance tracking, exam management and RESTful API with MongoDB

DineX: DSA-Optimized Food Delivery System (Python, Flask)

- Implemented Min-Heap, AVL Tree, Hash Table for priority ordering, menu search and O(1) user lookups
- Optimized delivery routing via Dijkstra's algorithm, improving route efficiency by 35%

Pateline: E-Commerce Platform (HTML, CSS, JavaScript)

- Built product catalog, shopping cart, checkout system with local storage persistence
- Ensured responsive design and JS form validation across all pages

Modest Aura (C#, MySQL, Windows Forms)

- Built role-based GUI application for modest wear with Admin, Seller, and Customer dashboards

Certifications & Achievements

- ITEC-25 Coding Competition Participant | UET Main Campus Lahore
- AI Web Hackathon Participant | UET Main Campus Lahore
- SQL Certificate | HackerRank
- JavaScript Certificate | SoloLearn
